## FOR IMMEDIATE RELEASE

### Document Data Solutions Moves to Brookfield, CT

**Brookfield, CT – May 5, 2016** - Document Data Solutions (DDS), a leader in Color and Monochrome Inkjet solutions, as well as Vision systems for Piece Level Quality Control, today announced the completion of their move to a new Brookfield, Connecticut location. The new facility significantly increases their manufacturing capabilities as it is over twice the size of their former location. The new 25,000 square foot facility gives DDS a greatly expanded product demonstration area showcasing many of their unique products and systems. An announcement regarding their plans for an open house is forthcoming.

“The expansion was made necessary by the continued growth we have experienced over the past several years,” said Robert Ellis, President of Document Data Solutions. “The new facility will give us increased capacity for manufacturing, new product development, as well as sales and support activities along with the larger product demonstration facility we needed for our Hybrid Inkjet Web Press solutions.”

This new larger facility will allow Document Data Solutions the ability to provide its customers with its unparalleled service, support and custom products far into the future.

#### **About Document Data Solutions**

Document Data Solutions (DDS), was founded in 2000 and is dedicated in providing unrivaled Vision, Quality Control, Piece Level Tracking, Management Reporting, Color and Monochrome Hybrid Inkjet as well as traditional Inkjet print solutions for the printing, mailing, bindery, and packaging industry. DDS can show you the power in your data.

Service after the sale is extremely important to DDS. That is why DDS provides “**ServiceInSeconds™**” the industry leading remote diagnostic capability that allows its customers, with a click of a button, to connect with a service technician in just seconds to help resolve issues and stay in production.
