

iDataPrint™ C500

The CMYK High-Speed Inkjet Envelope Press

High performance short-to mid-size run inkjet overprinting alternative to HalmJet presses or tabletop inkjet printers. The C500 features proven HP Scalable Print Module technology to deliver competitive print quality and low operating cost. The C500 is profitable on longer run print jobs enabling a faster ROI.

iDataPrint™ C500 Advantages:

- CMYK color workflow**
- Low cost ink**
- No press experience required**
- Small footprint**
- Right angle delivery option**
- 110V power**
- Read and print option**

The C500 provides all of the benefits of inkjet print systems including:

- High Speed 25,000 #10 envelopes per hour output
- Variable Data / Addressing capability
- Non-contact inkjet printing eliminates seam or seal flap lines
- Allows overprinting of new texturized papers
- Reduced setup time compared to offset for 1 to 4 color line and process work
- Use lower cost non-heat resistant window film compared to toner systems
- No offset plates, blanket, press solutions or lengthy washups or changeovers
- Nearly zero setup waste for 1 to 4 color line and process work
